- CFVGA is the go to resource for Colorado produce growers of all types and sizes and for their supporting goods and services.
- The Colorado fruit and vegetable growing sector contributes nearly \$300 million to Colorado at the farm gate and is multiplied as it goes through the distribution chain.
- Over 60,000 Colorado acres are in fruit and vegetable production.
- Last year's conference drew over 300 growers, allied industries, researchers & health-focused organizations, nearly double the number of attendees expected.
- Health concerns from individuals, institutions and restaurants place the Colorado fruit & vegetable industry in an enviable position to promote wholesome, local produce.

Your organization needs to be an EXHIBITOR, because it is an opportunity to:
